

Edible Soil Lab

While you wait to be called; work on your rocks and soil study guide.

When you are called, please get the following materials:

1 cup

1 spoon

1 napkin

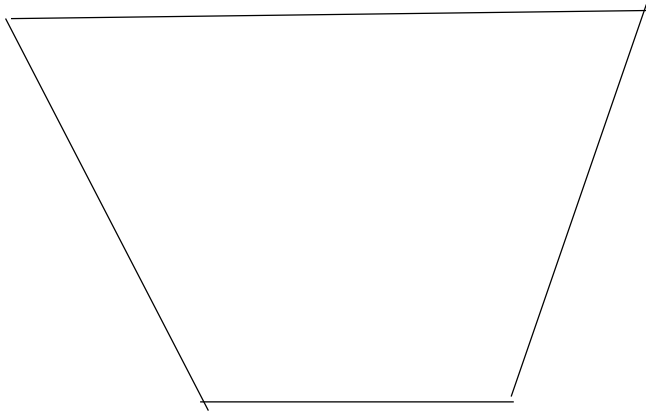

****When you return to your seat, place spoon on your napkin****

Continue to work on your study guide and wait to be called to get your edible soil food supplies.

Edible Soil Lab

- Once you have been called to receive your edible food supplies, return to your seat and complete the following on your lab sheet:
- 1-Analysis and Conclusion

Draw, color and label the horizons of your edible soil lab.

Once you are finished with this step, **WAIT** until Mrs. Picha indicates to move to the next step. While you are waiting for your classmates, continue to work on your study guide.

Edible Soil Lab

- Take your spoon and carefully mix the ingredients within your cup.
- With your group members, complete question #2 of the lab. Be sure to indicate what the ingredient represents within the soil horizon. In addition make sure you indicate on the line to the right, what is found within the horizon and/or it's function within the soil horizon.
- Complete the last question, #3 with your group and then turn into the drop off bin.
- Eat your edible soil cup!!
- Wash your hands at your designated sink; fold lab apron and place in the middle of your lab table
- Dispose of cup, spoon and napkin into the large grey garbage bin on your way out of the classroom.
